Project 3

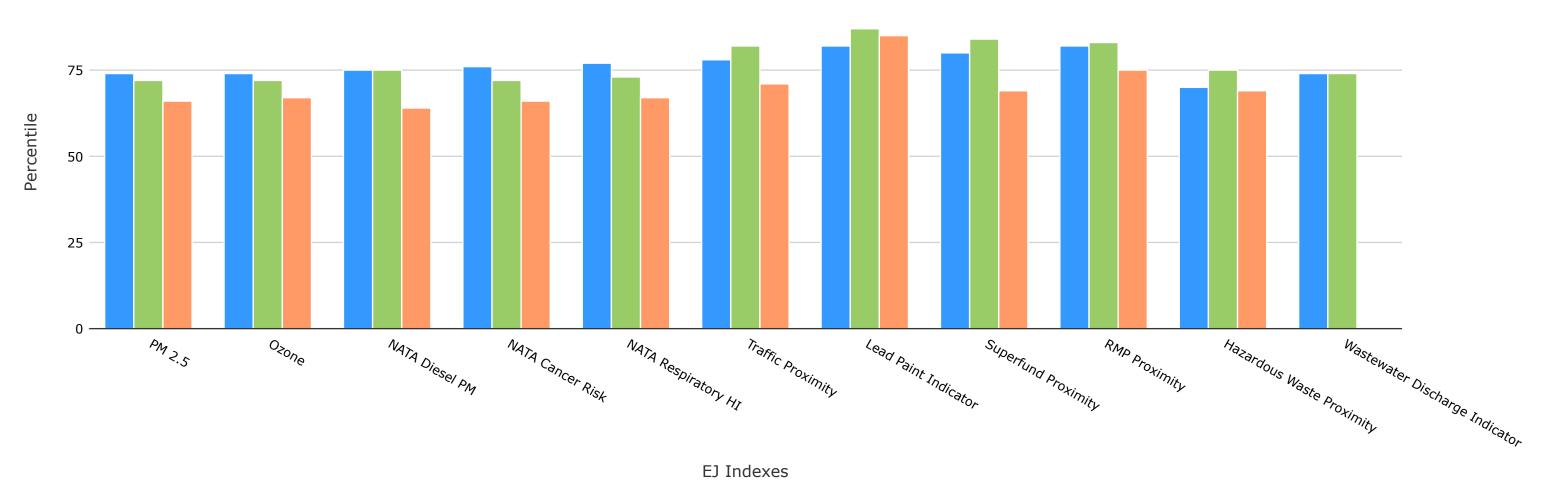

EJSCREEN Report (Version 2019) Blockgroup: 120050016004 FLORIDA, EPA Region 4 Approximate Population: 864

Input Area (sq. miles): 0.29

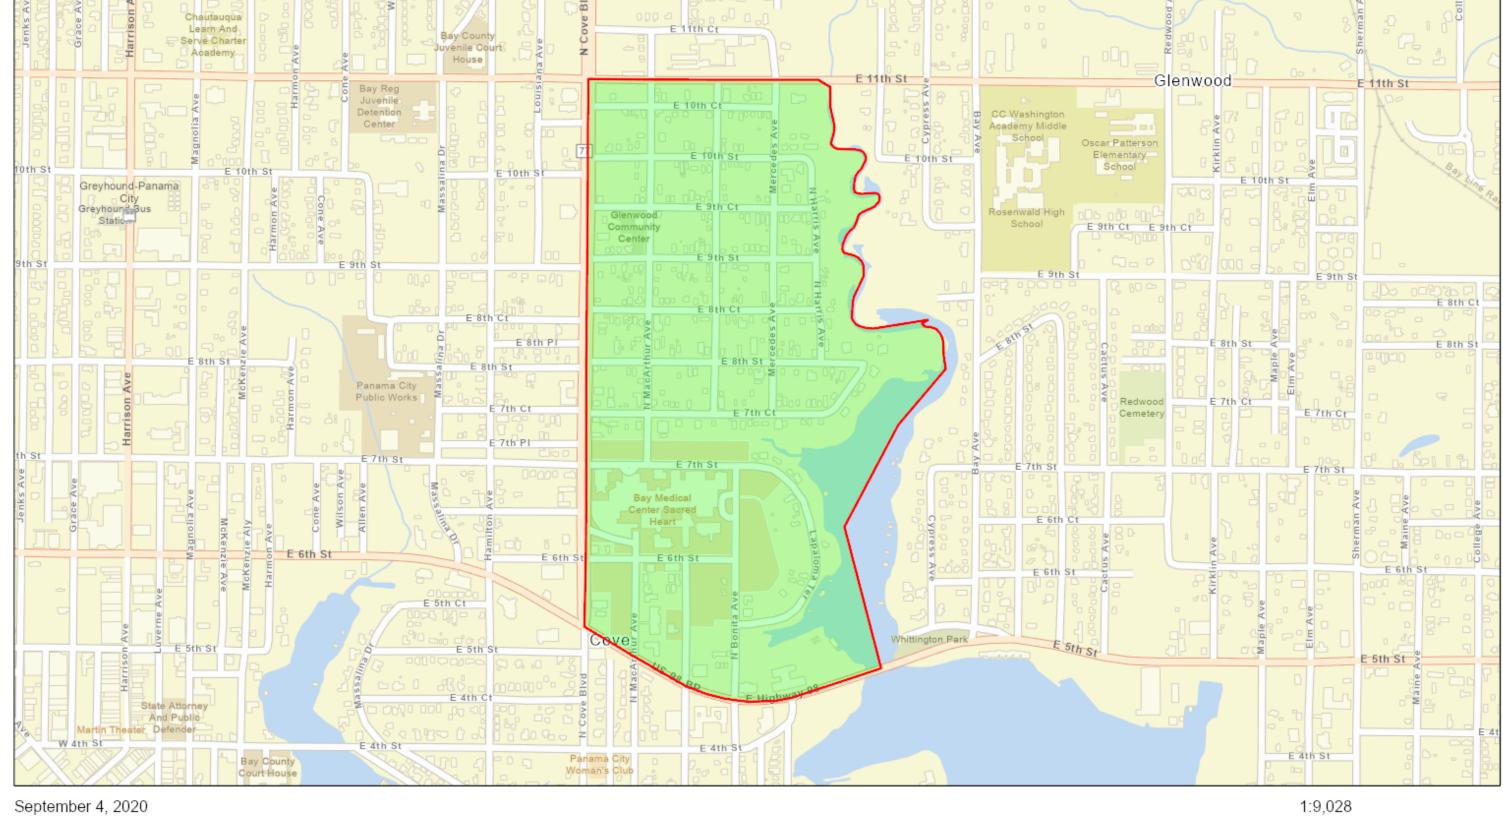

Selected Variables	Percentile in State	Percentile in EPA Region	Percentile in USA		
EJ Indexes					
EJ Index for Particulate Matter (PM 2.5)	66	72	74		
EJ Index for Ozone	67	72	74		
EJ Index for NATA* Diesel PM	64	75	75		
EJ Index for NATA* Air Toxics Cancer Risk	66	72	76		
EJ Index for NATA* Respiratory Hazard Index	67	73	77		
EJ Index for Traffic Proximity and Volume	71	82	78		
EJ Index for Lead Paint Indicator	85	87	82		
EJ Index for Superfund Proximity	69	84	80		
EJ Index for RMP Proximity	75	83	82		
EJ Index for Hazardous Waste Proximity	69	75	70		
EJ Index for Wastewater Discharge Indicator	N/A	74	74		

EJ Index for the Selected Area Compared to All People's Blockgroups in the State/Region/US

📕 State Percentile 📕 Regional Percentile 📃 National Percentile

This report shows the values for environmental and demographic indicators and EJSCREEN indexes. It shows environmental and demographic raw data (e.g., the estimated concentration of ozone in the air), and also shows what percentile each raw data value represents. These percentiles provide perspective on how the selected block group or buffer area compares to the entire state, EPA region, or nation. For example, if a given location is at the 95th percentile nationwide, this means that only 5 percent of the US population has a higher block group value than the average person in the location being analyzed. The years for which the data are available, and the methods used, vary across these indicators. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports.

Selected Variables	Value	State		EPA Region		USA	
	Value	Avg.	%tile	Avg.	%tile	Avg.	%tile
Environmental Indicators							
Particulate Matter (PM 2.5 in µg/m ³)	7.63	7.43	57	8.59	21	8.3	30
Ozone (ppb)	36	33.7	65	40	24	43	13
NATA* Diesel PM (µg/m ³)	0.418	0.557	38	0.417	50-60th	0.479	50-60th
NATA* Air Toxics Cancer Risk (risk per MM)	34	33	54	36	<50th	32	60-70th
NATA* Respiratory Hazard Index	0.52	0.49	63	0.52	50-60th	0.44	70-80th
Traffic Proximity and Volume (daily traffic count/distance to road)	410	550	62	350	77	750	63
Lead Paint Indicator (% pre-1960s housing)	0.3	0.11	85	0.15	84	0.28	62
Superfund Proximity (site count/km distance)	0.097	0.13	62	0.083	78	0.13	65
RMP Proximity (facility count/km distance)	0.88	0.79	69	0.6	78	0.74	73
Hazardous Waste Proximity (facility count/km distance)	0.28	0.47	66	0.52	63	4	42
Wastewater Discharge Indicator (toxicity-weighted concentration/m distance)	0	0.48	N/A	0.45	42	14	37
Demographic Indicators							
Demographic Index	68%	41%	84	38%	87	36%	87
Minority Population	79%	45%	80	38%	85	39%	83
Low Income Population	56%	36%	81	37%	80	33%	84
Linguistically Isolated Population	0%	7%	29	3%	51	4%	45
Population with Less Than High School Education	20%	12%	79	13%	76	13%	78
Population under Age 5	5%	5%	47	6%	41	6%	39
Population over Age 64	21%	19%	70	16%	78	15%	81

*The National-Scale Air Toxics Assessment (NATA) is EPA's ongoing, comprehensive evaluation of air toxics in the United States. EPA developed the NATA to prioritize air toxics, emission sources, and locations of interest for further study. It is important to remember that NATA provides broad estimates of health risks over geographic areas of the country, not definitive risks to specific individuals or locations. More information on the NATA analysis can be found at: https://www.epa.gov/national-air-toxics-assessment.

For additional information, see: www.epa.gov/environmentaljustice

EJSCREEN is a screening tool for pre-decisional use only. It can help identify areas that may warrant additional consideration, analysis, or outreach. It does not provide a basis for decision-making, but it may help identify potential areas of EJ concern. Users should keep in mind that screening tools are subject to substantial uncertainty in their demographic and environmental data, particularly when looking at small geographic areas. Important caveats and uncertainties apply to this screening-level information, so it is essential to understand the limitations on appropriate interpretations and applications of these indicators. Please see EJSCREEN documentation for discussion of these issues before using reports. This screening tool does not provide data on every environmental impact and demographic factor that may be relevant to a particular location. EJSCREEN outputs should be supplemented with additional information and local knowledge before taking any action to address potential EJ concerns.
