

How to solicit input from key players or select constituencies for narrative entries

- Host a community forum (ask community members to weigh in on narrative questions); record and transcribe
- Conduct interviews (ask interviewee to weigh in on narrative questions); record and transcribe
- Call key players and ask a set of thoughtfully prepared questions; record and transcribe
- Create a sounding board (or input/feedback space) on WhatsApp or wherever your partners meet to keep the conversation flowing
- Ask community leaders to write an answer to a prompt specifically about the community. Honor their lived experience, and their version of how the groups working together began to collaborate and what their collaborative activities and actions have been.
